WASHINGTON, Dec. 11.—The War
Department has received a report from
Gen. Chaffee of the incident that occurred at Peking in connection with his representations to
Fleid Marshal Von Waldersee. It spmears that Gen. Chaffee did use some
pretty vigorous language in protesting
against the thieving and looting of the
foreign tropps. What partousarity hurt
Count Von Waldersee was a pointed reference by Gen. Chaffee to the fact that
this diagraceful and unmilitary practice
of looting was being indulged in, not
by the men who did the fighting and
opened the way to Feking, but by the
late comers who had borne none of the
brunt of conflict and hardship. Waldersee himself did not reach Peking untill long after the expeditionary force
had occupied the town.

Gen. Chaffee had provocation for his

"One reason why the telegraphers of the Atchison, Topeka and Santa Féwere ready and even anxious to espouse the cause of their brethren on the Gulfilme was a deception practiced on the telegraphers' committee by Vice-President Barr in Chicago last June. An agreement had been effected between the railroad company and the operations' committee, and the latter sent home with the promise that the agreement would be sent to Topeka for printing. When published the schedule had been changed to read so as to add one hour to the time of every night telegrapher on the rond.

"Mr. Barr said to me he had made the alterations after the committee had left Chicago, stating as an excuse that he had misunderstood the article as it was originally written.

Adoption of the Modification of Treaty Would Probably not Be Satisfactory to Her-Secretary Hay's Neg-

BY THE NEW ASSOCIATED PRESS-A.M

WASHINGTON, Dec. II.—A prominent official of the State Department said today:

"There is no foundation whatever for the story that this government has assurance from that of Great Britain that the canal convention will, if rattled by the Senate with the pending amendment, be accepted by the British Cabinet. No such promise, suggestion or intimation has ever reached the State Department from any official source, and the department does not know what action the British government would take in the event the pending treaty is amended as proposed. Every intimation, however, that hue reached here goes to show that the adoption of any amendment would be regretted by the British authorities.

"Through misunderstanding, or some other reason, the impression was conveyed to the public as a result of the proceedings in severe assist of the proceedings in severe assist of the proceedings in severe assist of the treaty, that Secretary Hay had stated that he would reagn his office if the pending Davis amendment to the Hay-Paunoefote treaty were adopted. The Secretary's attitude in the matter was purely negative. THE NEW ASSOCIATED PRESSAL OF COMMITTEE OF COMMITTEE

In presenting his inquiries, Senator Beveridge referred to a portion of the second article of the Clayton-Bulwer agreement basing his first question largely upon it. Referring to that article of the old treaty, he said that it not only appeared to guarantee the neutrality of the canal, but to prohibit fortifications and to stand in the way of either Great Britain or the United States acquiring territory in Central America. This clause had raised a doubt in his mind, as he believed it had in the minds of others, and he thought it should be cleared up.

Replying to the rst of these inquiries, Senator Lodge said that, frankly, in his opinion under the pending treaty the United States would be stopped from extending its domain into Central American territory, as the new negotiations did not abrogate that portion of the old treaty.

Senator Foraker expressed the opposite view, saying that unquestionably the United States could extend her domain into that region if it to desired, just as Engiand had done in taking possession of the Mosquito country. The Ohio Senator replied affirmatively to a question from Senator Mason as to whether the United States could acquire and annex a South American country as we have amezed Hawaii, with the complete assent of the country coming under our protection, but on this point, Senator Lodge said that under thenew treaty, we, as a nation, of course, would be allowed to secure and hold property in connection with the canal, but not to extend our territory in the region of the proposed waterway. In reply to other questions, he said that he did not believe that under the Hay-Pauncefote treaty, even as it was proposed to amend it, there would be any authority to fortify the canal permanently. He did not believe, however, that under that instrument as it was desired by the Foreign Committee to amend it, there would be ample provision for the defense of the canal by the American people.

Senator Teller announced his intention of formally offer his amendment, which he has already suggested,

FIGHT OVER REDUCTION.

(BY DIRECT WIRE TO THE TIMES.)

WASHINGTON, Pec. 11.—[Exclusive Dispatch.] There is bound to be a big fight in the Senate over the reduction of \$10,000,000 in the beer tax which the House has put into the Tax Revision Bill. The wine producers of the country who were heavily taxed under the war revenue act, and whose tax is not reduced under the present bill, are preparing to fight the reduction of the beer tax. New York wine producers are already becoming active, and are trying to induce California producers to join them.

Senater Aldrich, chairman of the Senate Finance Committee, who will have charge of the tax bill when it reaches the Senate, says he opposes a reduction of the beer tax, even of \$30,000,000. He says he prefers to see the beer tax left alone and the tax reduced upon wines instead.

justice that the fast vessels should receive the greater bulk of the subsidy. He maintained that the bill as formulated by the committee would not tend to increase the merchant marine of the United States.

"It," said he, "Senators will examine the testimony taken before the committee, the conclusion will be reached that the shipowners have a thorough organization to carry through this legislation. They are not seeking opportunities to build ships, but they are trying to secure legislation that will enable them to go in the public treasury and draw \$9,000,000 annually to divide among themselves. If those who favor this legislation are acting in good faith, why did they not provide that the subsidy shall be paid to those who will build ships hereafter?"

Senator Clay vigorously attacked the amendments which had been made to the bill since the present session of Congress began, and presented a long technical argument in support of his assertion that they had been made in the interests of a favored class of shipbuilders. He held that as only ships constructed within the time specified by the bill could enjoy the subsidity it would be impossible for capitalists to build new ships after the lapse of the specified period to compete with the subsiditied vessels.

After discussing the facilities of the providers and owners than to the farmer who produces wheat, or cotton or corn. If the shipowner is entitled to a subsidy, he contended, the farmer is equally entitled to one.

(BY THE NEW ASSOCIATED PRESS—P.M.)

WASHINGTON. Dec. 11.—Col. Mills,

based upon the full investigation made
by himself of the report that the late
Cadet Oscar Boos was hased and otherwise mistreated at the academy. The

tis enactment. The one definits thing known about the operation of the proposed legislation was that it would take from the treasury of the United States \$9,000,000 a year for twenty years and donkte that vast sum to the shipowners carrying the foreign trade of this country.

Senator Clay said that under the bill, the subsidy to be given vessels up to twelve knots, which are really our great freight carriers, is only 1½ cents per gross ton, while the subsidy given to a fast steamer, which carries chiefly passengers and fine manufactured goods, is 38-10 cents per ton for a twenty-one-knot ship. He elaborated what he deemed to be the "injustice and inequality of the measure in this respect;" presented a comparison of cargoes carried by the St. Paul, a swift steamer of the American line, and the Manhattan, one of the great freighters for the Atlantic Transportation Company, The comparison showed that the Manhattan a fourteen-knot ship, carried immense quantities of agricultural and manufactured products, whils the St. Paul carried practically no manufactured or agricultural and manufactured products, whils the St. Paul carried practically no manufactured or agricultural sproducts, yet the Manhattan will receive little more than one-third of the subsidy given the St. Paul.

Senator Clay contended that the greater part of the exports of the United States were carried in steamers of least han eleven knots speed, and that it was not within the bounds of justice that the fast vessels should receive little more than one-third of the subsidy. He maintained that the built as formulated by the committee would not tend to fine the product of the carried in steamers of least than eleven knots speed, and that it was not within the bounds of justice that the fast vessels should receive little more than one-third of the subsidy. John Astor Chanler Who Escaped from Asylum Still at Large.

NEW YORK, Dec. 11 .- [Exclusive Dispatch.] John Astor Chanler, the insane millionaire grandson of John Jacob Astor, who escaped from Bloomingdale asylum twelve days ago, is still at large, and his relatives now fear that he has perished. Descriptions of the unfortunate man have been in the hands of the police all over the country since

he escaped, but absolutely no

New York Produce Exchange, of selections of California and Sicily lemons, have attracted much attention in green-fruit circles. The comparisons were as follows:

Ninety-one and one-half California lemons would yield one United States gallon of Juice. One hundred and twenty-eight and one-half Mediterranean lemons would yield one United States gallon of juice. The specific gravity of the juice in each was 1.041.

Three hundred California lemons would yield 450 ounces avoirdupois juice, containing 25.44 ounces avoir crystal citric acid. Three hundred Mediterranean lemons would yield 255 ounces avoir juice, containing 19.79 ounces avoir rystal citric acid. Three hundred Mediterranean lemons would yield 255 ounces avoir rystal citrio acid.

The criticism of the fruit importers was chiefly that the date selected for the test was a most unfair one, in that it compared Mediterranean fruit which was among the first of the season and which had not matured, with California fruit at its best stage. It is expected that the Fruit Importers' Union will take the matter up in the near future and will probably have an independent test made.

extent of \$10,000. They have not been caught.

Rev. Father M. Grosso, professor at the Jesuit institute at Turin, was the victim. Two handsomely-dressed men, apparently Americans or Englishmen, called about a fortnight ago and told him they were trustees of a rich or-hann boy whose father was killed in the war in the Transvaal. They told the priest they wished to place the boy under his care, to be educated in that institute. At the same time, sold the custorians, £40,000 belonged to the ward, and they desired to leave it in the priest's charge.

Father Grosso consented to take the boy under his care and accepted the custody of the funds. The two strangers displayed several bundles of bank notes, apparenty genuine, which they placed in the compartments of the safe, which Father Grosso accommodatingly opened for them. The pair then teft, stating they were going to Milan, where they had left their young charge, and would return.

SEATTLE (Wash.,) Dec. 11.—The
mystery surrounding the strange disappearance of John Harder, who was
last seen Tuesday night, November 19,
was solved today by the finding of his
body in the bay. Every appearance
points to murder. On Harder's head
were several wounds which were probably made by a blunt instrument from
behind. The trousers pockets were
turned inside out, showing hat he had
been robbed.

What lends further color to the murder theory is the fact that Harder was
seen early in the morning after leaving his work, at a beer hall on Second
street, in company with a strange man
who said he came from Montans.

"Hermit of Waneng Mountain" Found Dead and His Home in Ruine—Was a Confederate Veteran.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, Dec. il.—(Exclusive Dispatch.) The Tribune's Morristown, N. J., special says the body of a man found yesterday in Black Swamp, four miles from this city, has been identified as that of Herman Bins, known as the "Hermit of Wanong Mountain." For thirty-five years he had lived a solitary life, far removed from the nearest house. His home was found in ashes today.

Bins came to the mountain in 1865. He first wore a gray uniform on which were the stars of a brigadier-general. He was then a young man, but seemed prematurely old. He would not talk then or afterward about himself. He merely gave his name and lived alone. Intercourse with others was limited to conversation needful to buying supplies. Ten years after Bins settled on the mountain his life story came out. William Becker, a veteran of the Union army, related upon his return from a visit to Atlanta in 1875, how he had been struck by the name of Hermin Bins in connection with a war relict there. He found from the records that Hermin Bins had been entitled to wear the shoulder straps he had on when he came to New Jersey.

Young Executive Says He Will Attempt to Remove Ill-feeling—Killing of Goebel not Referred To—Will Serve Three Years.

IBY THE NEW ASSOCIATED PRESS—A.M.]
FRANKFORT (Ky..) Dec. 11.—With perfect weather and in the presence of a vast throng of people, Gov. J. C. W. Beckham was inaugurated today for the three years remaining of the term for which William Goebel and William S. Taylor contested last year.

With the booming of cannon at 11 o'clock the inaugural procession took up its march. Two regiments of the State Guard, the Duckworth Club of Cincinnati, and many political clubs and civic societies were in line. It was about noon when the procession reached the Capitol.

The oath of office was administered to the Governor by Chief Justice Haselrigs. After the ceremonies at the inaugural stand, the Governor reviewed the State troops.

Gov. Beckham in his inaugural address did not refer to the murder of William Goebel. He promised the State a clean and honest administration of its executive affairs in a spirit of fairness and tolerance, with no feeling of partisan hate or malice, with the sincere desire to remove as far as possible all friction and ill-freeling from among the people. He said it would be his policy to keep the State Guard in a first-cleas condition, but that the military power shall always be in absolute subordination to the civil authority, and shall never be called into active service except as a last resort to carrying out the decrease of judicial tribunes.

The decoration of the grave of the late Gov. Goebel took place this afternoon.

In addition to this engagement there
had been several minor encounters between the troops and the insurrectiontets.

GUAM CONDITIONS IMPROVED.

The United States hospital ship Solace has arrived at Cavite from San Francisco. Her officers say the condition of affairs at the island of Guam has clearly improved since a week ago. Dwellings are being restored and the people are resuming their occupations, but the crops are practically destroyed, though there is no immediate want. The Solace left supplies there and the Arethusa has taken a considerable quantity of supplies to Guam from Cavite. The reports as to the number of deaths are about unchanged.

The wives of Commander Seton Schroeder, Governor of Gaum, and other officers who went to the island on the Solace, remained at Guam.

TARIFF BILL DISCUSSED.

The United States Philippine Commission discussed the preliminary parts of the tariff bill in committee of the whole. Merchants made a few suggestions. hTe importers are watching for the decision of the Supreme Court of the United States on the Porto Rican tariff. They say that if it is decided to be unconstitutional they will claim a return of all duties paid on goods from the United States since the date of the Paris Treaty, and will also claim the return of port charges on vessels from the United States. Up to the present and pending a superseding law. Spanish duties have been levied, which impose import taxes on goods from the United States. Upward of \$5,000,000 has accumulated in the Philippines from customs and other taxes.

LONDON; Dec. 12.—[By Atlantic Cable.] The "House of Commons today voted £18,600,600 to carry on a war which Lord Roberts has recently announced as "finished," at full-scale cost for another three months, in the list-less manner characteristic with its dealing with finametal questions, and carwful avoidance of what may turn out to be unjustifiable hopefulness.

Broderick's speech was rather gloomy and passimistic. His debut as Secretary of State for War, though uninteresting, was not disappointing, but the House, apathetic after the exciting debates of Monday, and like the nation, tired of war, was in no mood for severe criticism. Otherwise the fact that not even the volunteers could be sparsed to come home, and other matters in Broderick's statement, would have given chance for level of the was the matter of the properties.

WHEN AN EMPLOYER MUST MAKE REGULATIONS.

Not every business requires rules to be made for the guidance of employes. But when the business is large and complex, like that of railroads, factories, mines and the like, in which large numbers are employed, then the duty of making such rules as will give reasonable protection to employes clearly exists and should not be disregarded.

proved that the superintendent had given some oral instructions with respect to doing the work. It was contended that a set of rules ought to have been made for conducting the business, and that if this had been done the accident would not have happened. The court thought otherwise. "There was nothing in the nature of the business," said the court, "that made it necessary for the company to make and publish rules. The business had been conducted in the same way for years before, and no accident had happened, and one could reasonably be apprehended or anticipated. Even if it could be shown, after the accident occurred, that it might have been prevented by adopting and enforcing some suitable vule, that would constitute no preper test of liability. The failure to adopt rules is not proof of negligence, unless it appears from the nature of the business in which the servant is engaged, that the master, in the exercise of reasonable care, should have foreseen and anticipated the necessity of such precautions."

LAW LESSONS: EMPLOYERS
AND EMPLOYEES.

IX.—AN EMPLOYEE'S DUTY TO INSTRUCT EMPLOYEES.
BY ALBERT S. BOLLES, LLD.

WHAT is an employer's duty in the way of giving instructions to his amploye's? To answer this question fully our inquiry may be divided into three branches. The first of these relates to his duty to make and set forth rules and regulations for the greater safety of his machinery, appliances or enterprise, and also for the greater safety of his employes. Many of these rules, as we shall soon learn, are prepared more especially for the benefit of youthful and inexperienced persons.

WHEN AN EMPLOYER MUST MAKE REQUILATIONS.
Not every business requires rules to course a many an accident, and a support of the persons who sued the company that such a rule was in operation on other roads. . . or unless the necessity and propriety of making or formmon experience and knowledge, the court further thought that the rules in usual to the court further thought that the rules in occurrence of such an accident, where the company was at fault in omitting to the jury a wide field for speculation and conject on the part of the persons who sued the company that such a rule was in operation on other roads. . . or unless the necessity and propriety of making or formmon experience and knowledge, the court further thought that the rules in usual to the court further thought that the rules in operation of the persons.

BIJUPPS THE RESULT.

The result has been to force most of the saloon men to procure a restaurant liquer license in addition to the saloon license and to install some pretense at a culinary department in their place of business. This necessitates a monthly expenditure of \$70 on the part of the saloon keeper which he deems an injustice. It has also put a premium on all subterfuges by which the spirit of the law can be evaded and makes difficult conviction for illegni liquor selling. The condition is deplored alike by the saloon men and by the temperance class. There are many people, however, who think an opportunity to procure liquor with meals should be given at a lower license rate than is demanded of saloons. The difficulty canes in drawing the line between what is and what is not a bona fide meal.

Much difficulty was experienced by the Council yesterday in securing the the Council yesterday in securing the necessary quorum to continue the official canvass of the votes cast at the late city election. Councilman Toll had gone to San Francisco with the Mayor, and in the latter's absence President Silver was obliged to assume the duties of Mayor. essary to complete the count, a margin of only one was left.
Listening to how it happened that you were defeated is not exactly music to charm the sous, and the clerk spent the morning in trying to get six alder-men together at the City Hall. The feat was accomplished at ten minutes before noon, and then an adjournment was taken until 1:30 pm. It was not until 2:30 p.m. that the Council met. The law provides that the official canvass must be made within ten days, and tomorrow is the last day of grace. The officers elected are taking no chances.

No changes worthy of note occurred yesterday. W. H. Workman, who was ejected Treasurer by a narrow margin over his Republican competitor, W. A. Hartwell, has made a net gain of three votes by the count. All the precincts except 48A, which returned no official tally sheet, have been counted. In precinct 45A none of the election officers signed the tally sheet, and the official vote will not be announced until they have made affidavit to the count. Minor irregularities were also found in Precincts 42, 55, 56 and 73B. In some cases one or more of the officers neglected to sign the tally sheet. They will be summoned to the City Hall this morning, so that everything may be

COUNCIL IN A QUANDARY.

May Retain Haas.

It is probable that the Council will vote at the next session to retain the present City Attorney, Walter F. Haas, until the litigation in the case of the West Los Angeles Water Company against the city is completed. Mr. Haas is conversant with the case, and some members of the Council deem that it would be unwise to turn it over to those who are not so familiar with the issue involved. The case has already been on trial in the Superior Court for twenty-three court days, and there is little probability that all the testimony for the city will be in

Will of Mrs. Andrews, Divorced Wife of a San Luis Obispo Banker, Filed for Probate-Asks a Son-in-law to

The will of Mrs. Tennessee Amanda Andrews, aged 56, who died in this city on November 28, at the residence of her brother, T. S. Cheney, No. 423½ South Spring street, was filed for probate in the Superior Court yesterday. The estate of the deceased is valued at \$46,000, of which \$8500 is cash in the bank and over \$20,000 in stocks, notes and mortgages. The balance is real estate situated in Santa Monica and in San Luis Obispo, Kings and Kern counties. The heirs surviving the deceased are eight children and three grandchildren by a deceased daughter. Of the ninchildren Mrs. Andrews, in her will, dated October 16, 1900, disinherits five, and bequeath; her property equally to John Andrews, aged 25, who lives near Ventura, Jerome, aged 14, and Leroy Ventura, Jerome, aged 14, and Leroy aged 15, who are attending the Eton

W. Booker.

It is Booker, the son-in-law, who is named in the will as executor.

The children deliberately forgotten by the mother are Alice Morton, aged 40. Mary Elliott, aged 32, George Andrews, aged 38, all of San Luis Obispo. David Andrews, aged 30 of Pomona, and the three children of Carrie Breed, the deceased daughter, who live in San Luis Obispo. Their names are May, Hasel and Nathaniel Breed.

In naming her son-ir-law as executor, Mrs. Andrews also fixes the succession of the appointment in case of fils disability, and adds by way of emphasis that "in no event shall any of the diginherited children, nor her former husband, John Pickney Andrews, be appointed executor of the will, or have anything to do with the administration of her estate, or the management of her property."

It is understood that a contest is in contemplation by the left-out heirs.

Mrs. Andrews was the guardian of her two minor sons, Leroy and Jerome. Yesterday a petition was filed by their father, John Pinkney Andrews, asking that he, or any fit and proper person nominated by the boys, be appointed their guardian. Andrews is a San Luis Obispo banker. A number of years ago he and his wife were divorced.

Judge-Shaw made an order yesterday appointing Booker special administrator of Mrs. Andrews's estate under a \$50,000 bond.

BROOKS NOT TO BE PROSECUTED.

J. Mary Ann Brooks is not to be prosecuted for extortion. And the many difficulties over money and partnership affairs between himself and the complaining witness, A. A. Montaño, hay been amicably settled.

Wherefore the felonious charge preferred against Brooks in the Township Court on Monday was dismissed yesterdey afternoon.

Court on Monday was dismissed yesterday afternoon.

The Philippine war is off. Two angry attorneys have osculated and made up. Two peas in a pod are fierce in comparison with their amiability.

Montaño charged that Brooks extorted \$78 from him in money and checks on Saturday at the point of a pistol. Brooks in defense said Montaño owed him the money for groceries supplied his family while he was in Manila, practicing law as a member of the firm of Brooks, Byers & Montaño, and that he wouldn't reader any settlement when money was plentiful.

THE KILLING CASE. THE KILLING CASE.

Attorney Phibbs came into Justice Austin's court yesterday afternoon asking that the charge of threats to kill standing against Brooks be dismissed. The case was to have come up yesterday morning, but went over until today. Justice Austin was not in and the case could not be dismissed. The motion will be made this morning.

With all their angry passions assuaged, Mr. Brooks and Judge Montano had a little love feast on the street corner last night.

"We have decided to settle this little matter peaceably," said Montano, looking with real affection at Brooks.

"Just a little dispute over a matter of business," said Brooks, forgiving himeel for all the cruel things he had said about Montano.

"We are still going to be in partnership," said Mr. Brooks. "We may go back to Manila together, but first Mr. Montano must take a little trip for his health."

And he glanced around the telegraph, pole with tenderness at the young man Attorney Phibbs came into Justice

for his health."

And he glanced around the telegraph, pole with tenderness at the young man whom he had chased around town with a gun. Perhaps he was just trying to get Mr. Montano to take a proper amount of exercise. Maybe the whole thing was one of those pretty little devices of true love.

BANKERS' ALLIANCE ACCOUNTS.

California figures in the action.

In March, 1898, plaintiff was given judgment against the Bankers' Alliance in Santa Barbara county for \$5413.65. In the following June the Sheriff of this county served an attachment on Washburn, as receiver of the alliance, which he claimed he could not acknowledge without authority of the Superior Court of Los Angeles county, whence came his appointment. Last September the Supreme Court decided that Washburn's appointment as receiver was void, and now plaintiff is suing him personally for the amount of the judgment. California figures in the action.

BREVITIES MISCELLANEOUS. petitioned the court to be appointed guardian of the persons and estates of her four minor children, who live with her at No. 1747 Magnolia avenue in this city. The children are each entitled to a one-sixth interest in their late father's \$1000 life insurance policy.

WING'S TRIAL. The trial of Wing, charged with the murder Wong Woon last September, was down by Judge Smith yesterday January 21, 1901.

PINTHER FREE. Henry Pinther, whose Jury was unable to agree on a verdict in his criminal assault case on Saturday, was discharged on motion of the District Attorney yesterday. Pinther is now free. The evidence against him was deemed insufficient to warrant another trial.

UNFAITHFUL WIFE. Judge Shaw gave H. W. Westfall a divorce from Edith Westfall yesterday on the ground of marital unfaithfulness.

SUPERVISORAL CONTEST. When the trial of the Supervisoral contest between C. E. Patterson and James Hanley was called in Judge Allen's court yesterday, plaintiff's motion that the case be dismissed without prejudice was granted. Through an inadvertence the date of the passage of the Supervisors' resolution of Hanley's election was wrongly pleaded, and rather than take any chances on the old case, Attorney Meserve preferred to make a new start. Another complaint will be filed at once, and Judge Allen has promised to dispose of the matter as soon as possible.

of Stevens and Frasier. Mr. Dryden is the heaviest loser, but C. B. Boothe, Mat Morrell, Martin and other oil men have lost large quantities of oil. The specific charge upon which Frasier was arrested was taking 230 barrels from Dryden's tanks on September 20.

The peculations were carried on with an astonishing boldness and nerve. The police claim to have discovered that Prasier has been hiring men to take oil from various tanks in the oil region and having it delivered at the receiving tanks of the Oil Storage and Transportation Company. It was placed to Frasier's credit, and sold from the receiving tanks of the Oil Storage and Transportation Company. It was placed to Frasier's credit, and sold from the receiving tanks to various people.

Some of it went to Gardena consumers, some to El Monte. The rest of the oil went out to the country and in and about the city. These country-side purchasers had their own tank wagons, and simply got the oil from the receiving tanks on an order from Frasier, and were entirely inhocent figures in the transactions.

So were the teamsters who conveyed it from the oil wells to the receiving tanks. Stevens was employed for a time at one of Dryden's tanks, taking the place of an engineer named Friel, who had been hurt in an accident. Frasier was also employed at an oil well, and the teamsters had no means of knowing that the affair in which they played a part was not straight. The tanks from which the oil was taken were all unlocked. Frasier or Stevens would engage a teamster to go out before daylight to one of the tanks for oil. It was always represented as a hurry call to get oil into the market to meet some special emergency. Usually the wagons went out at 2 or 3 o'clock in the morning. The regular price for hauling oil is 7 cents a barrel, but in consideration of the hour Frasier and Stevens paid 10 cents. They could afford to be generous.

The oil was recorder at the tanks always in the name of Frasier, and either he or Stevens always went with the wagon to get the oil. One of

LONG WISH FULFILLED.

THE PEOPLE of Los Angeles have been wishing for a first-class restaurant like other large cities have. Now they have what they wished for. A fine restaurant has been opened this week on Third St., bet. Spring and Broadway, (formerly Jerry Illich's,) now being styled Del Monte Restaurant. Since last Monday's opening, the place has been overcrowded. The accommodations of the extensive establishment were taxed to their utmost, but proved equal to the occasion. The main dining hall and every one of the 38 private dining apartments were occupied, even the banquet hall on the top floor being pressed into service.

this number of the programme was a rattler, thrilling, enough to be the "real thing." The painted and mounted Indians swarmed in scores around the whirling coach until they were driven off by the even more ferocious cowpunchers, who suddenly appeared from behind a convenient shelter and opened fire with a will. A prominent part is taken in the carnival by the clergy of Phoenix. When the bliftight was about to materialize the ministers took a hand and induced the United States authorities to stop the affair. Now the preachers are fighting against immoral shows on the Midway.

Among the attractions, there is a "Little Egypt" show, and to this the pastors take exception. This evening they sent one of their number to investigate it. He "took in" the sight from beginning to end, and at the close of the performance reported it as vulgar grossly so. Thereupon, a committee of ministers waited upon the Carnival Association, with the result that there will be a speedy modification

continental Territory.

[BY THE NEW ASSOCIATED PRESS—A.M.]

CHICAGO, Dec. II.—A proposition which virtually amounts to a suggestion that Northern Pacific colony rates be applied through Missouri River gateways to California points was submitted by telegraph to railroads in the transcontinental territory and promptly yoted down.

mitted by telegraph to railroads in the transcontinental territory and promptly woted down.

The proposition follows: That second-class colony trains, west-bound only, to California points and intermediate points affected be: From Chicago, 330: from St. Louis. New Orleans and common points, \$2..60: from Missouri River and common points, \$25. These rates to apply via all roads to which regular short-line second-class rates apply. Tickets to be soid each Tuesday from February 12 to April 30, inclusive. Regular second-class tickets to be used, the contract and each coupon to be indorsed "colonist" and limited. not to exceed twenty-four hours beyond regular scheduled time.

The seconds are practically the same as for tickets via St. Paul and to the North Pacific Coast. The dates are the same. Although the proposition was voted down, fears are entertained that some road may take independent action and force these rates into effect. No particular object, it is claimed, is to be served by them, as business to California at present is unusually heavy, so much so that all the roads have been compelled to put on additional trains. If the rates go into effect, vast amounts of revenue, it is said, will be sacrificed and Colorado and Utah rates may be permanently affected.

Los Angeles Man Will Pocket One Hundred Thousand Dollars Today from Sale of His Gold Mine.

then came down to where I made the debtedness to opulence, was the step taken by Exra M. Hamilton of this city, when he discovered the rich "Lida" gold mine. Fortune smiled on this grizzled veteran of the Civil War, one day early last March, and since that hour, he has beer transformed from a poor old soldier, receiving a pension of six dollars a month, to a wealthy gold miner. During the last six months the owner has taken out of his mine \$30,000 with a two-stamp mill.

The find came to Hamilton after almost half a century of hunting in the mines of California. It came just in the nick of time, for, says Mr. Hamilton, "three more days of unsuccessful made down to where I made the big strike."

Department's Equipment and Work Second to None in the West—Causes of Pires—Valuable Property—Statis-tics of General Interest.

At the regular meeting of the Board of Fire Commissioners this morning Chief Strohm will submit his annual report, which is one of the most complete and comprehensive ever filed with that body. It was prepared by Capt. Robert Burns, secretary of the department, and covers a score or more pages of typewritten manuscript. The present Chief has been at the head of the department since April 1, and the portion of the report from December to that date refers to the work of exchaft date of the sign because of irregularities in his administration of the business of the department.

FOUR HUNDRED ALARMS. FOUR HUNDRED ALARMS.
During the past year the department has responded to its alarms, 69 of which were false. There were 247 actual fires. From fire boxes 234 alarms were received; 57 were telephone alarms, 15 combined box and telephone alarms, 15 combined box and telephone alarms, and 8 special alarms to engine houses. During the previous year there were 255 alarms. One hundred and forty-five of the fires were in dwellings, 52 in rooming and lodging-houses, 7 in hotels, 7 in barns, outhouses, etc.; 35 in stores, factories and other mercantile establishments, and 41 were miscellaneous fires in sumpholes, brush, rubbish, grass, etc. There were no general alarms, and only two second alarms, one at the fire at Heywood Bros. & Wakefield Company's storeroom, and the other for the fire which destroyed a number of houses on East Second street near San Pedro. destroyed a number of st Second street near San LOSSES AND CAUSES.

A wedding wherein all the arrangements are to be both simple and artistic, is to take place at high noon today at the home of Mr. and Mrs. M. K. Shields, No. 1327 Bush street, when their daughter, Miss Clara Louise Shields, is to be united in marriage to Willard Russell Price of Monrovia, the service being solemnized by Rev. John L. Pitner, pastor of the Westlake Methodist Episcopal Church. The bride will wear a tailor-made travelling gown of gray cloth, with white vest of muli and lace, with a black hat of velvet and ostrich feathers, and will carry bride's rosss. The pair will enter to the muste of the bridal march from "Tannhauser," played by Miss Pearson, who will render a transcription of "I Would that My Love," by Mendelssohn, during the ceremony. Afterward Miss Pfice, the sister of the groom, will sing "Thine is My Heart." by Curschman. The decorations of the pariors are in pink and white, relieved by green, and will be developed in ribbons, carnations, hamboo, palms and potted plants. The estermony, which will be witnessed only by relatives and a few intimate friends, will be performed under a canopy of pink and white ribbon and ropes of smilax, from the center of which two d ves will hold suspended a true lover's knot. Dainty portieres of smilax and carnations will depend from the grille work between the two rooms. The reception hall is to be adorned with scarlet carnations and ivy. The dining-room will be brightened with cardinal and green, American Beauty res-a and ferns adorning both buffet and table. Here Hicks will serve an elaborate be akfast, after which music will be rendered by friends. The newly-married couple will leave this afternoon for a short say in Santa Barbara. There are good traces of oil in the well of the Edgar Oil Company on section 18, 28, 28.

It is the intention of the management of the Gray Gander Oil Company to let a contract for a well at an early date, to be drilled on section 7.

The Traveler's Oil Company is rushing a carload of machinery to its property recently, purchased of the Grace Oil Company. The company acquired ten acres and a producing oil well.

Jefferson. 73: Burr, 73; Adams, 65; Pinckney, 64; Jay, 1.

The events of the national election in the United States was at last known, though the popular vote had been cast more than a month before. It became evident that the Electoral College would show the vote to stand as follows:

Early in the spring of 1800 it became manifest that the Federalist party was losing ground. In April the New York State election went against them. Soon after this the dismissal by President Adams of some of the Cabinet officers who were too friendly with Hamilton caused an irreparable break in the party. Hamilton printed a severe attack on the President, and endesvored to make arrangements for giving Pinckney a majority of Federalist

MUSCLE AND NOT FAT. hat Thin People Need to Round Off

What thin folks need is flesh or muscle, not fat.

To be symmetrical and properly proportioned every person should have a certain amount of excess flesh, but to be plump does not necessarily mean to

be fat.

Fat is undesirable; it clcgs and retards the action of the muscles, interferes with the healthy action of the heart and lungs and when very excessive, predisposes to fatty degeneration of vital organs, to say nothing of the discomfort resulting from too much adipose tissue.

discomfort resulting from too much adipose tissue.

Common sense would suggest that if one wishes to become fleshy and plump the thing most needed would be flesh forming food, that is, albuminous foods like eggs, beef, oatmeal, etc.

The kinds of food which make flesh are the foods we have on our tables every day; but the trouble is that our stomachs, from weakness or derangement of some kind, do not promptly and properly digest it.

Really, the principal reason so many

and properly digest it.

Really, the principal reason so manypeople remain thin is because their
stomachs do not properly and completely digest and assimilate the flesh

ple and natural digestive, like Stuart's Dyspepsia Tablets, the food would be Dyspepsia Tablets, the lood would be quickly digested and the proper degree of plumpness very soon result because these tablets are prepared exactly for that purpose. They digest every va-riety of flesh forming food, which is the real reason why they so quickly build up and strengthen thin, dyspeptic men

and women.

Stuart's Dyspepsia Tablets cure every form of indigestion on this common sense plan, that they thoroughly digest the food promptly, giving strength to every nerve and organ in the body, and he weakened stomach a chance to rest the weakened stomach a chance to rest and recover its natural rigor. Nothing further is required to cure any stomach trouble, except cancer of the stomach. They make thin, dyspeptic people strong, plump and well.

This excellent preparation is sold 50

electors that he might be chosen Fresident. As the election drew nearer the result grew steadily more certain that the Republicans would be victorious. The Federalists were disheartened by the internal dissensions which split their party into factions more hostile and jealous toward each other than toward the common foe. Defeat was further insured by the admirable condition of the Republican party. Jefferson was a born organizer, and Burr in New York had proved a really able political opponent. Finally election day came, and now the last of the State Legislatures had met and selected its electors—the Federalist supremacy was broken, but the end was not yet. The unexpected complication—a tie—had arisen. Thus the country was ushered civil war, and during which the Constitution passed through a strain of such severity that all men wondered at its surviving.

surviving.

It was a campaign of vituperation throughout. One of the stories concerning Jefferson charged that "he had obtained his property by fraud and robery; that in one instance he had defrauded and robbed a widow and fatherless children of an estate to which he was executor of £10,000 sterling." Burr came in for more than ordinary abuse. The better element of the Republicans, as well as that portion of the Federalists, saw in him a dangerous man. Hamilton, knowing that Burr's

The unsettled conditi of affairs in China and in South Africa has served to distract attention in a measure from commercial question during the past few months. But these disturbances will soon, it is to be hoped, be adjusted, as will our own troubles in the Philippines. Then will the attention of the commercial world be turned to questions of trade. The adjustment of the troubles in China will in all probability leave the "open or" wider open than ever. That England-our chief competito n the world's markets-is much per dent in many ways. "We have long ceased to enjoy that
relative superiority in natural advantages with which we started upon the
race. Look across the Atlantic and
what do we see?—a nation which in
point of numbers is almost, if not
quite, double our own nation, sprung
to a large extent from the same stock,
nurtured among the same free tradito a large extent from the same stock, nurtured among the same free traditions, endowed in at least as full measure as we with facility of invention and spirit of enterprise, occupying a country unrivaled in extent, and with a diversity of natural resources, and enjoying throughout the whole of that yast territory the incalculable boon of internal free trade. Can we wonder that such a nation, under such circumstances and conditions, is the most formidable of our industrial competitors?"

For lo! there many years it has been that our protective tariff system barred us out of the world's markets. We have been treated to long and windy dissertations intended to prove that in the nature of things tariff protection must have this effect. But this beautiful theory, like many another theory which looks well on paper, has been proven false by the inexorable and unanswerable logic of events. We have won the place of supremacy in inter-national trade under a strong protec-five tariff, which has fostered our domestic industries and preserved to us our home markets, while in no wise hutting us out from the markets of the world. Indeed, our heaviest exports have been sent forth to the world's markets during the periods when our duties on imports were highest-a fact which in itself goes far to lisprove the free-trade dictum that a And today, under the policy of tariff protection, we stand virtually at the head of the world's commerce. We have met the greatest free-trade nation earth in the more important fields of competition, and in no case been vanquished.

The triumphs which we have won are as nothing to those which we shall yet win, if we press forward without faltering in the path which we have

The present title is fa sion of its first presentation The Times said that "while the success of the plece is scarcely to be measured by a single performance there would seem to be abundant evidence that after the polishing which all new plays must undergo, 'Fortune's Fool' will be found an entertaining feature in this fine player's repertoire. . Throughout the development of the play the interest is well surface.

The polishing process has been applied, with the result that the play i strong situations, many excellent lines, strong situations, many excellent lices, and its characters are intelligently developed. It affords opportunities for picturesque costuming, which are well improved, and the staging of the play is satisfactory. There are numerous incongruities, and the poishing process might be continued further to advantage. Some of the scenes are rather too long-drawn-out, and would be improved by judicious cutting down. In the third act, where Cecco and Nina de Borgia exchange costumes, the auditor is asked exchange costumes, the auditor is asked to take a great deal for granted; but his is not an unheard-of thing in dramatic literature, and even the divin William of Avon sometimes taxes our credulity pretty severely (for the sake of the story.)

oredulity pretty severely (for the sake of the story.)

Taken for all in all, "The Duke's Jester' is a decidedly entertaining play, with nicely-sustained interest, and it is equal to many other plays of its class which have won success. Mr. Warde's talents are perhaps worthy of better material; but then, a versatile actor must have variety.

The Warde company appear to better advantage in this place than in "Richelleu." Mr. Warde, in the role of Cecco, the Jester, is called upon to portray a variety of emotions. It is needless to say that he is equal to all deless to say that he is equal to all de-

"Richelieu." Mr. Warde, in the role of Cecco, the Jester, is called upon to portray a variety of emotions. It is needless to say that he is equal to all demands, for he is an actor of fine quality, whose artistic instincts are seldom at fault. It would seem, however, that he could better his interpretation of this character by toning down the emotional part a triffe. A man in tears may be an impressive spectacle in a sentimental novel. but is a rather mussy and disagreeable spectacle whim presented corporeally upon the stage. It is easy, however, to pick minor flaws in the work of any actor; and, as we know, even Phoebus, the God Obay, is not without his dark spots. Mr., Warde's portrayal of Cecco is on the whole an impressive and interesting impersonation.

Isabel Pengra-Spencer does superbwork in the role of Nina de Borgia. Her treatment of the character overflows with artistic feeling. It is so close a simulation of "the real thing" that the auditor forgets himself, and regards her, not in the light of an actress playing a part, but rather as a beautiful woman in distress; and his sympathies go out to her, as they should do under such circumstances. This is one of the highest triumphs of art—to deceive the such circumstances. This is one of the highest triumphs of art—to deceive the such circumstances. But both Mr. Spencer and Mr. Warde fall down' when they exchange costumes and attempt to imitate each other. The people on the stege are the only ones who are misled by this in-effective masquerade.

A Boston china house received two interesting orders recently. One was from Cecil Rhodes, to be sent to his residence in Cape Town, South Africa, and the other was from Mrs. Hudyard Kipling, to be sent to her home, The Elms, Rottingdean, Sussex, England.

The will of Charles H. Smith of Providence, who in his lifetime made a number of benefactions, contains several public bequests: To the Rhode Island Historical Society, 33000; to the Rhode Island Hortiguitual Society, 23000; to the City public schools for the purchase of microscopes, \$1000; to Brown University, \$3500; to the Home for the Aged of Pawtucket, \$1000, and real estate valued at upward of \$20,000 for the maintenance of the botanical specimens in the city park.

It is announced that the statue which the German Emperor has ordered to be erected to the memory of his late father in front of the Brandenburg gate, between the Thiergarten and Unter due to the Linden, is already in the course of execution. Prof. Adolph Bruett it is who has designed the model. Carrara marble has been chosen for the monument, which represents the late Emperor as wearing a cuirassier uniform, with helmet and mantel thrown back; so as to show the Order of the Black Eagle which he is wearing on his breast.

New Christmas Neckwear.

You will find the newest things in the neckwear world on our counters this morning. The best work of the New York, London, Paris and Berlin designers, may be found in our Christmas collection. All the fluffiness, all the daintiness, all the becomingness you can find any place you can find here. In addition you can find much exclusiveness and originality that you cannot find elsewhere. Among the new things are-

Beautiful batiste collars, trim'd with Arabian laces, \$2 and \$7.50. The new Sapho, a combination

of taffeta silk in various colors with gold; several widths and styles; 85c to \$1.50. Real lace ties in rose point and Renaissance and Duchess lace ends, \$4.50 to \$18.00. Chenille ruffs. in beautiful new color effects, \$4.50 to \$15.00.

New military stocks, the collars of velvet and gold trimmed, 50c to \$1.25. French jabots with stock col-lars in chiffon beautifully garat-tured with lace, \$1.25 and up.

New collars and reveres in white and gold, black and gold, and all black, exquisite applique effects, \$2.50 to \$10.00.

Waist Lengths in Fancy Silks.

We will make a sale this morning of fancy silks in waist lengths. Plain and novelty weaves, quite a large variety of colorings. The prices will run from \$2.00 to \$6.00 a pattern, and you will have to look long and hard to find a more suitable Christmas gift for the money than one of these waist patterns. To make the event doubly interesting the prices are half or a shade less than half you have been paying for the same goods by the yard.

Choice of any Suit in the house, \$17.50. Next best lot at \$12.50.

All Jackets reduced in same proportion. All Skirts and Capes likewise.

There is no place in Los Angeles where your cloak and suit money will go so far as it does here. We are closing out this department, and you are not asked to pay a cent of profit on any article. In many cases our price to you is less than the first cost to us. The closing out of departments is not and never has been a money-making business. We expect to lose and take our losses gracefully.

CLAIM THE WATER COMPANY HAS BEEN MISMANAGED.

Deeply in Debt and Heavy Assessments Levied, While the Water Rate Seems Four Times Too High Compared With Santa Ana Valley Rates.

FULLERTON, Dec. 11.—[Regular Correspondence.] Two-thirds of the stock of the Anaheim Union Water and there is a great deal of dissatisfaction here, the same as on the Anaheim side, over the alleged misman agement of the affairs of the company, which is now in debt over \$170,000, causing heavy assessments once or twice a year. The stockholders have just finished paying an assessment of \$2.50 per share. There is talk of holding a dety official paper came up for consideration. Only a few weeks ago they committed an error in relieving the bondsmen of R. H. Norton, then publisher of the Daily Standard, which had the contract for doing the city printing, without the knowledge of the prietor of the paper, consideration.

pioneer stockholder stated today that the result would probably be about the same as in the past—men who hold and control heavy blocks of stock will again gather in proxies long before the meeting and elect themselves or friends as directors. This has been done year after year.

During the past year, it is alleged, the company has expended over \$50,000 in purchasing land, while this amount would have built La Habra reservoir, which would have stored millions of gallons of water for summer irrigation, thus reducing the price to consumers. The water is divided by a gate-below Rincon, half going to Orange. Tustin and Santa Ana, and the other half coming to Fullerton, Placentia and Anahelm, the Santa Ana Valley Irrigation Company controlling the water in the first-named sections, and the Anahelm Union Water Company on this side of the river. During the summer months, when most of the water is used, the people in the local company have to pay 80 cents per hour for 100 inches, while the Santa Ana Company only charges 20 cents an hour for the same service during the same months. The small stockholdere, both in Anahelm and Fullerton, who are not, standing in with the wealthy stockholders, say something must be done in their behalf, but they seem powerless. A prominent Placentia stockholder stated this morning that he doubted the legality of acts of the water board for some time past, as a member of the board of directors (Mr. Cargili) does not own a share of stock in the company.

Roadmaster Hunter said today it would cost about \$1200 to replace the bridges and repair the damages caused by the late rains in this section. It will take \$600 to build the bridge washed out near the county line between Fullertor and Whittler. Mr. Hunter also stated that he would soon begin grading Placentia avenue from the Hansen place to the Tuffree corner, a distance of one and one-eighth miles. When completed, this avenue will be one of the most beautiful driveways in the county, as it is lined with shade trees and coay homes, and the finest orange groves in this section.

At a meeting held at Placentia last night to discuss the grading of the Fullerton-Placentia road, over \$1000 was pledged to pay for hauling the gravel, which is to be spread on the road at the expense of the county. A committee consisting of G. W. Sherwood, J. C. Sheppard and C. C. TALKED OF EARTHQUAKES.

Listen to an Interesting Paper on Natural Shocks.

"Earthquakes" was the subject discussed last night at the regular monthly meeting of the Academy of Sciences, and the topic proved interesting to the members present, it being treated in a paper read by Prof. J. F. Chamberiain of the State Normal School.

He stated that although quakes had been known ever since the world began, the earliest recorded, occurred about 1500 years B.C. In Numbers XVI, in the Bible, an earthquake is spoken of that killed 250 people, and on the day that Christ was crucified the earth trembled from an internal explosion. As early as the year 136 of the Christian Era, the then Chinese Emperor appointed a committee to investigate the causes of earthquakes. The speaker stated that a shock could be felt in any part of the world if the proper instruments were ready for use at the time. Few shocks originated from a greater depth than twelve miles, and if the rocks were homogeneous, the shock could be felt at every point at the rame time.

In April, 1886, a shock moved from Japan to upper Russia, at the same speat. The Charleston earthquake of the same year, disturbed over three million square miles of territory, traveling 3½ miles per second. The shock in Los Angeles last Christmas was felt in Sait Lake City.

From 1768 to the present time, there have been 1500 shocks in this State according to the speaker, enly thritteer of them destructive. In 1852, in layo county, in the State, in 1872, in layo county in the State, in 1872, in layo county feet without toppling it over.

Prof. Chamberlan closed by briefly referring to the causes of earthquakean and several miles in length. In Inyo county, in 1890, an earthquake moved a hay stack seventy feet without toppling it over.

bridged the dam, but half way over paused. In the water she could see the reflection of the stars and the moon and the trees far above. Her own shadow fell clear-cut and dark on its surface; but only for an instant.

She slid off the tree trunk and sank without a noise into the water. A few air bubbles rose to the surface and floated a short distance, broke and were gone. The reflection of the stars and the moon reappeared in the glassy water; a foyote screamed up the mountain; then all was silent save the soft drip of the dam, and the rushing of the creek below.
